

Active Fiber Capacity Multiplication Card

Product Description

Active fiber capacity multiplication (FCM) is mainly used to realize the rapid expansion of the fiber core, which can greatly improve the efficiency of using and minimizing the occupation of urban fiber space resources and support the OSC remote network management.

Product Features

- Low Insertion loss
- Easy installation and maintenance
- High compatibility

Product Specification

Parameter	Index
Transmission Rate	GE/10G
Channel	8
Transmission Distance	10Km
Power Consumption	<36W
Connector	LC/UPC
Humidity	≤ 90% (No condensation)
Operating Temperature	0 to 50 °C
Storage Temperature	-20 to 70 °C
